Report of School Board

To the Citizens of the School District of Gilmanton:

The information generally desired by members of the school district has been so far given in the report of the supervisor of the district of which Gilmanton school district is a part and herein published, and the purposes of the newly established high school so fully verbally stated at the annual meeting of the district that established the high school, that occasion does not exist for further elucidation of our school problems at present. Prof. Channing T. Sanborn in his report alludes to the establishment of the high school "As by far the most important event of the school year." It is one of the most important events in the life of Gilmanton and one destined to play as crucial a part in its social, intellectual and industrial prosperity of the town as any event that has marked its history. Considering the resources of the town, the creation of the high school reflects great credit on the vision and breadth of purpose of our citizens.

But this is merely introductory to the remark that the number of students attending this school represents only those of the first three years of its six years' course. The entrance classes for the other three years to come will swell the total enrollment when the first graduating class goes out, in all probability to 40 or 50 students. In case surrounding towns, rural in character and without high schools, patronize ours for its courses adapted to their needs, more students may be expected. This is said to prevent misapprehension by some of the meaning of so few students. The school board is gratified at the members enrolled for the first year and regards conditions as quite promising.

J. W. SANBORN,
Chairman School Board.

REPORT OF THE SUPERINTENDENT OF SCHOOLS
*To the School Board and Citizens of the Gilmanton
School District ;*

I herewith present to you my second annual report as superintendent of schools. This report must necessarily be limited in its scope. Many matters connected with the work of the schoolroom which might be of interest must be omitted for the sake of brevity. I suggest that there is no better way for the parent to find out just what we are trying to do in the schools than to visit school and to visit often, not waiting for some special invitation or some special occasion, or for some misunderstanding, to arise. The school to be a success must have the co-operation of the home. Teachers and parents are all at work on the same problem, the training of these boys and girls, and they need each others help and sympathy.

The rearrangement of the school register makes it difficult to give the detailed statistical report which has been customary. However, some matters of interest and which should be recorded will be found in the statistical table. You will see that there were nine elementary schools in session during the spring and fall terms and eight during the winter. The small number at Leon Pond only four, during the latter part of the fall term did not warrant a continuance of that school during the winter.

The attendance in most of the schools during the year has been good. Generally the better our schools the better will be our attendance. The record at one or two of our schools has not been what it should be. I am looking for a decided improvement this next year. The Corner school was somewhat broken up during the winter term by reason of an epidemic of whooping-cough.

The fact that so many children live at a distance from our schools and the fact that the families are so scattered makes it imperative that there be some transportation of

school children. The school board endeavors to be entirely just and impartial in this matter and must of course take into consideration the age of the children, the time of year and other factors. The largest part of the transportation is at the Gale school. Children are brought from two directions and at considerable expense. Nevertheless this seems to be the most economical and satisfactory arrangement.

Five of our teachers of last year remained with us. This was fortunate. Miss Ruth Calkin taught the Corner school very successfully during the spring but she was unwilling to remain longer because of the small salary. We were fortunate in securing Miss Arlene Caverly of Tilton for the fall and winter. Miss Caverly has made good. Miss Grace Merrill of Loudon has been at Jones' Mills during the fall and winter. Miss Merrill came to us without experience. She has handled the school well and has made steady progress. I hope we may retain her services. We were able to secure Mr. Frank Edgerly for the spring term at Smith Meeting house. He was followed by Miss Alice Page who shows in her school work the results of her experience.

We are paying our teachers small salaries in comparison to the salaries paid in other towns. The time is not far distant when we must either raise salaries or be content with teachers with poorer qualifications. It so happens that six of the eight elementary school teachers this winter term were Gilmanton women and they could afford to teach for a less salary inasmuch as they lived at their own homes. But it is not probable that we are going to be able to secure so many home teachers in the future. You may be able to appreciate the difficulty of securing a teacher to come from a distance and ask her to teach for \$7.50 or \$8.00 per week when she must pay \$4.00 and \$4.50 per week for board. It is perfectly evident that they will not come if they are the desirable type. And why should

they ? There are plenty of positions offering \$10.00 to inexperienced girls of the right personality and qualifications.

We have had a school year of thirty weeks. This is too short. This too is a handicap when it comes to hiring teachers. We are not paying salaries large enough so that teachers can afford to take a vacation of twenty-two weeks during the year. But, of course, the good of the children should be our first consideration. It is generally conceded that a longer school year is to be desired. I very much hope that we may have at least 33 weeks this next year.

By far the most important event of the school year was the opening of the Gilmanton high school at the Academy building in September. The school meeting in March voted to establish a high school and virtually instructed the school board to organize a school in which there should be special courses in agriculture for the boys and in domestic arts for the girls. The school board was materially assisted in carrying out the instructions of the school meeting by the Academy trustees who turned over to the district on a long term lease the entire academy property to be used in establishing and maintaining the high school. The state department of public instruction showed much interest in the school and assisted in working out a strictly up-to-date school program, a model for schools of this type. The school opened with Mr. A. L. Sturtevant, a graduate of Maine State University, as principal. Mr. Sturtevant came to us after four years experience in this kind of work, principally in the West. Miss Adelaide Merriman was the assistant chosen. Miss Merriman was a graduate of Farmington Normal School, and although she had had no experience she showed maturity of judgment and was well adapted to the work. She resigned at the close of the fall term and Miss Gertrude Cotton, a graduate of the three year special course

in domestic arts at Framingham Normal School, succeeded her. Miss Cotton is doing good work.

The school opened with 18 pupils. This number was increased to 23. By reason of removals from town it has dropped to 20. The school program contemplates six years of school work, from the seventh through the twelfth. It aims to train our boys and girls primarily for Gilmanton citizenship but will be of equal value to them wherever they may live. The work has progressed as well as could be expected. It takes time to develop such a school. There is a fine spirit among the pupils and the work is going on smoothly. We have a school of which we may well be proud and which merits the support of the community. The school is on the approved list of the state department and every approved school in the state is bound to give credit for all work done here. The success of the school will depend very largely upon the support it receives from the district and the citizens in general.

The state department conducted a very successful institute for teachers at the Academy building in October. The domestic arts class of the high schools served dinner to about eighty.

Much needs to be done at the Iron Works to the school grounds. They are unsightly and unattractive. The building is attractive in its design and should have move favorable surroundings. But of course we need most of all a playground for the children. I hope the district may think it wise to appropriate a sufficient amount to put these school grounds into better shape.

Considerable needs to be done in the matter of repairs to our school buildings. None of them with the exception of the Iron Works school can be said to be in a thoroughly sanitary and suitable condition. I presume that our resources this year must be largely devoted to meeting the

debt on the new building but another year should see us in a position to enter upon a definite plan for the betterment of the school buildings.

I am glad of this opportunity to record my appreciation for the support and encouragement that has been given me by the school board, teachers, pupils and citizens in general.

Respectfully submitted,
CHANNING T. SANBORN, Superintendent.
